### **Course Objectives**

This course will provide an overview of the common techniques for determining the structure and characteristics of polymeric materials. The goals of the course are as follows: 1) to equip the student with the knowledge necessary for deciding which characterization technique(s) would be appropriate for determining properties of interest; 2) to impart the student with sufficient background to enable the proper judgment of the quality of data obtained, and the significant variables effecting the results; 3) to enable the student to comprehend the polymer literature and make their own judgment regarding the interpretation of data. This course will not delve into techniques of general materials characterization except where the method differs when applied to polymers. Instead, the methods studied will typically be aimed at determining the polymer's size and molecular weight/distribution, primary structure of the backbone, nature of the chemical bonding environments, crystallinity, thermo/mechanical behavior, secondary conformations, tertiary morphology, surface or interfacial characteristics, etc..

### **Attendance Policy, Class Expectations, and Make-Up Policy**

- **Attendance and Expectations:** Attendance will not be formally monitored, but classroom contribution to discussions will be noted and taken into consideration for participation grade. Therefore, you may want to notify me of any necessary absences. Plus, for excused absences, I will provide you with my annotated lecture notes (which are not to be shared or posted on-line!), which highlight important concepts of that topic. Excused absences must be consistent with university policies in the undergraduate catalog (<https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>) and require appropriate documentation.
- **Homework:** Homework should be turned in at the beginning of class. No late submissions will be accepted in order that solutions can be posted after class. \* The lowest HW score will be dropped. Do not ask for excused

absences for additional drops (in other words, don't assume that you will never be sick or too busy to miss a HW at some later point).

- **Exams:** Only scientific non-programmable calculators are allowed during exams. Request one from me if you do not own or have access to one. A formula sheet will be provided during the exams (no notes or other sheets of paper should be present). A pen must be used for the final answer on the exams. Cell phones must be turned off and placed up-side-down during the exam.
- **Make-up Exam Policy:** Make-up exams will be provided with the prior approval of the instructor for excused absences. In general, acceptable reasons for excused absence include illness, serious family emergencies, special curricular requirements, military obligation, court-imposed legal obligations, religious holidays and participation in official university activities such as music performances, athletic competition or debate. If a make-up exam cannot be accomplished before the graded exams are returned, the missing exam score will be replaced by an average of the other two exam scores.
- **Grade changes:** Requests for adjustment to any grade should occur within the 2 week period following the posted grade in question, and must be approved by the course instructor (you can discuss your concerns with the TA, but the TA cannot change grades without final approval from me).
- **Policy on Cell Phones:** Cell phones should be turned off or on vibrate mode during class, with the exception of a primary care giver, who should notify me in advance (if/when receiving a call, promptly move to outside the classroom). Texting during class is not allowed, and you may be asked to leave.
