

Materials Science and Engineering Graduate Minor Contract

Graduate students from other majors who wish to pursue a minor in MSE must complete 9 credit hours of MSE courses for Master students or 12 credit hours of MSE courses for PhD students. The minor in MSE is set up by contacting the graduate coordinator in your home department (major) and the graduate coordinator in MSE via email at mse-gradcoordinator@mse.ufl.edu. After consultation, a contract will be created outlining the specific EMA-prefix courses required for the MSE minor. This arrangement must be made before or at the beginning of the minor coursework.

A minimum of one Materials Fundamentals Core course is required. The remaining courses may be MSE electives aligned with the student's academic or research goals. Only letter-graded lecture or lab courses are permitted (S/U courses are not allowed). All minor courses must be 5000–6000 level and carry the EMA prefix.

To successfully complete the MSE minor, students must earn a minimum 3.0 truncated GPA across the approved minor courses.

Note: The MSE Graduate Coordinator will serve as the Minor Faculty Advisor for students pursuing this minor.

For PhD students:

12 credits of Materials coursework:

- At least one Materials Fundamentals Core course (3 credits)
- 3 courses (9 credits) of EMA-prefix graduate level (5000 and above level) courses

For Master's students:

9 credits of Materials coursework:

- At least one Materials Fundamentals Core course (3 credits)
- 2 courses (6 credits) of EMA-prefix graduate level (5000 and above level) courses

Materials Fundamentals Core Courses:

EMA 6316 Materials Thermodynamics (Fall)

EMA 6136 Diffusion, Kinetics and Transport (Spring)
